<b>IDE Tools</b>	: Eclipse, Visual Studio, <b>IntelliJ</b> , Web Strom, Subversive SVN, Sublime Text, Git.
<b>Applications</b>	: Adobe Photoshop, Adobe InDesign, Adobe CQ5 (AEM)

### PROFESSIONAL EXPERIENCE:

**ServiceNow**, Santa Clara, CA

**Oct'18 – Current**

**Role: Senior Front End Developer**

**Description:** Our project drives the Marketing Org. at Servicenow. From handling events, campaigns and new product marketing, all of ServiceNow applications use our platform to create new content using our components.

#### Responsibilities :

- Developed components to allow business to create content in .com pages.
- Worked on implementing various **Javascript** applications from scratch to production.
- Styled pages using **SCSS** and added responsiveness and cross behavior to front end applications using mobile first approach.
- Worked on using **Node JS** modules and built microservices to satisfy the app requirements.
- Reviewed, analyzed, and modified code during testing and debugging, and in response to issues.
- Worked on revamping entire .com pages to follow new guidelines using **AEM 6.4**

**Intel Corporation**, San Jose, CA

**Feb'18 – Sept '18**

**Role: Front End Developer**

**Description:** I'm part of Integration project for which we developed webpages and AEM Components for Altera to integrate into Intel webpages and localize them.

#### Responsibilities :

- Developed components for **AEM (CMS tool)** to allow business to create content in websites that helps user to have a seamless experience between Intel and Altera pages.
- Worked with inbuilt CMS tool code editor (CRXde) to build replication version for the code.
- Enhanced and develop components inside AEM using **Node JS**, JavaScript and **SASS**.
- Developed scripts in **JavaScript**, CSS and HTML and JQuery.
- Ensured content is **cross-platform**/browser compatible, and responsive to mobile devices.
- Ensured **quality**, **accuracy** and **integrity** of website content and consistency of brand presentation and aesthetics for all site content

**Apple Inc.**, Cupertino, CA

**June'16 – Jan '18**

**Role: UI Developer**

**Description:** I'm part of "Apple Care" project for which we developed webpages for different products at apple and localize them.

### Responsibilities :

- Developed **javascript** code using framework of team's choice to satisfy the requirement of specific projects.
- Built **React JS** components to equip internal applications with reusable components.
- Used PostgreSQL to create database and store data fetched from **Node JS** application.
- Worked on **HTML5** and **CSS3** to work around the issues that were generated by **CQ5** (CMS tool).
- Unit, Integration, System and User Acceptance **Testing** for customer facing application pages.
- Based on the UI prototypes, we build pages in the system called Adobe Experience Manager (**AEM**).

**Goji (Consumer United), Boston, MA**

**Feb'16-May'16**

**Role: Web UI Developer**

**Description:** Goji is combining cutting-edge tech and old-fashioned expertise to make shopping for auto insurance clear and simple

### Responsibilities :

- Delivered a complete front end application built with **Angular JS** following single page and **MVC** architecture to ensure high performance on mobile and desktop.
- Built a real time **analytics** application to show the performance of insurance agents for all periods of time.
- Wrote a tested, re-usable and documented **JavaScript**, HTML and CSS
- Cooperated with the back-end developer in the process of building the RESTful API, and shared the process update through out the whole built.

**AT&T Corp., Arlington Heights, IL**

**July. '15 – Nov 15**

**Role: Full Stack Web Developer**

### Responsibilities:

- Revamped plain **Javascript** with **HandleBars JS & Angular JS** to satisfy the requirement and used **API** calls.
- **Code Reviewed** other's code part to submit it to the server for deployment in the application.
- Worked on **HTML5** and **CSS3** in creating web templates with rich internet design and solved bugs.
- Worked on challenging environment by keeping up with the ticketing system to solve bugs and played key role.

**Nielsen, Chicago, IL**

**March '15 – June'15**

**Role: Web UI UX Developer**

**Responsibilities:** Wrote client side code using **Ext JS** as a single page application to create charts and graphs to visualize data.

- Created pop-up menus and screens in application using Sencha cmd to maintain a full set of lifecycle management features code minification provided by ExtJS framework.
- Implemented **MVC** and made the application **cross browser** compatible by solving many Browser issues, especially with Internet Explorer and Firefox.
